

Manicuring Transcript

00:00:03:11 - 00:00:24:23

Carmen Kwasnik

I chose the Manicuring program because I've always had an interest in like the beauty industry and like the beauty business as a whole. At the start of class, by the bell, you're in your uniform, which is our smocks, black pants, black shoes. And then for the first half of the day, we do theory work, so we have workbooks to work through.

00:00:25:00 - 00:00:52:05

Carmen Kwasnik

We learn a lot of anatomy, a lot of health conditions, and the hair and the skin and nails, as well as how the beauty industry works. How opening your own salon or renting a chair, how that would be incorporated also. And then we also, the second half of the day do practical work. So manicures on each other, practicing nail art, the specific skills that a student will learn how to do nails, do nail extensions, nail art.

00:00:52:12 - 00:01:15:20

Carmen Kwasnik

The plan is after you get your 400 hours at the town center, you can go and take the licensure exam. I plan to use the skills that I've learned in manicuring to hopefully one day have my own salon. I'm planning on getting work in a, you know, in a salon and then hopefully getting like some sort of business degree and then opening my own salon.

00:01:16:00 - 00:01:37:05

Just apply and at the beginning it seems kind of daunting, but the way the class is taught, our instructors, they make an environment where you're learning, but you're also having fun and being creative and you're learning skills that are so useful and exactly what you want to do. And it's really valuable.
