

BioScience Careers Transcript

00:00:03:12 - 00:00:16:08

Amara Rogers

I chose the Bioscience program because I wanted to have a head start in my career. I want to major in biology. Typical day in bioscience is probably a lot of lab work.

00:00:16:10 - 00:00:29:16

Hailey Bryde

There's never, like the same day. We're always in the lab doing something different, always learning something new. And there's multiple like things we get to learn, like forensic DNA, and it's just never the same thing. And you're always learning something new.

00:00:29:18 - 00:00:44:14

Amara Rogers

We use micro pipettes, analytical balances, lots of expensive equipment, chemical fume hoods and like all the glassware you could dream of and a lot of other things.

00:00:44:17 - 00:00:53:23

Hailey Bryde

We have competition coming up very soon. I'm doing vet science. It's a lot of work, it is. But working towards it, like since the beginning of the year, has been fun.

00:00:53:23 - 00:01:14:00

Amara Rogers

Something I would say to a student who's considering the program is to definitely go for it. We do a lot of different sciences, so it's not always just one thing. So we switch every few weeks so you can really see what you want to get into and what you enjoy doing. If you want to come back for a second year at Bioscience, you do have to do the water check program.

00:01:14:01 - 00:01:18:18

Amara Rogers

With that, you'll have many opportunities with job shadows and internships.

00:01:18:23 - 00:01:24:06

Hailey Bryde

You're going to want to do bioscience because it's going to like show you what part of science you want to do.
