I picked this program because I wanted to start off slowly. And working here is it's honestly perfect. The teachers here, they treat you great. They make sure they have everything they need for you to succeed. It's definitely helped me communicate more. It's made me think a whole lot more what I'm doing. It's making me more focused on what I'm doing.

I feel more responsible doing all that stuff, you know, running the store. It's it's a whole lot of fun. Sometimes it can be challenging, but overall, it's a well-balanced experience For someone to be in this program. Over here would be the cashier over here. We run up the money and have people get get the stuff that they need.

The stocker stocks, all the food here, the snacks and drinks back there. And then the greeter stands right by the door and greets people one at a time. Students can earn many certificates in this school. And the ones that I have obtained are OSHA, ServSafe and keyboarding. After being in this for this year and last year, I hope to learn more, more of the responsibilities.

I'm still learning. I'm obviously, but there's a whole lot more than to what I've just learned. It's an exciting thing to learn, too. That's what makes it fun in this class. What I would suggest is coming into this, see what the other kids are doing. Obviously, talk to the teacher who works here too, because she's got the most experience and just ask any questions.

Just experience it before you think about starting it.
